DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/13/2008 has been entered.

Allowable Subject Matter

2. Claims 21-34, 36-48 and 51 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not disclose

“an indicator comprising a prominence coupled to and protruding from the follower, for indicating one of two indication states, in which in one indication state the indicator protrudes outside a bottom wall of the housing and in another indication state the prominence indicator does not protrude outside the bottom wall of the housing, wherein one of the indication states corresponds to a state where the magazine is in a full condition, that is when it is filled with bullets up to a maximal capacity, and another indication state corresponding to a state where at least one bullet is missing with respect to the full condition”.

The closest prior art US 784786 issued to Gottardi shows a magazine comprising a housing for storing bullets in a stacked configuration, with an opening for receiving the bullets, a follower 3 for supporting the bullets within the housing, movable along the housing and resiliently pressing

Art Unit: 3641

towards the opening, so that at any time, when there exists at least one bullet within the housing it is presented at the opening, ready to be discharged; an indicator comprising a prominence (bottom button 2 in Fig. 1), for indicating one of two indication states, in which in one indication state the indicator protrudes outside a bottom wall of the housing and in another indication state the prominence indicator does not protrude outside the bottom wall of the housing, wherein one of the indication states corresponds to a state where the magazine is in a full condition, that is when it is filled with bullets up to a maximal capacity, and another indication state corresponding to a state where at least one bullet is missing with respect to the full condition. However, in Gottardi, the prominence 2 is not coupled to and protruding from the follower 3 nor could it be constructed in such a manner and operate properly.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
